SAN DIEGO FC TRANSFER & SCOUTING DASHBOARD

Using data to shortlist players for an inaugural MLS season within a $250M budget

THE CHALLENGE

A brand-new club, a $250M budget and no scouting history

01

Shortlist targets

Find players who fit the squad’s needs and the budget, from performance data rather than reputation.

02

Compare candidates

Put goals, assists, discipline and market value side by side for players in the same position.

03

Build a balanced squad

Balance position needs, age and cost for a roster that competes now and keeps its value.

THE DATA

Public Transfermarkt data, cleaned in Tableau Prep

Dataset	What it adds
Appearances	Goals, assists, cards, minutes
Player valuations	Market value over time
Game events	Match-level events and substitutions
Transfers	Fees and transfer history
Clubs	Club details and spending
Club games	Team results and context
Competitions	Leagues and tournaments

Preparation

- Dropped unused fields such as coach name and URLs
- Removed transfers with no recorded fee
- Renamed overlapping fields so tables join cleanly
- Excluded players inactive since 2015
- Rolled match data up to player-level metrics

THE DASHBOARD

Five linked views, from the whole market to a shortlist

1

Market overview

Top scorers, values, fees, positions

2

Attack and midfield

Goals + assists against value

3

Defenders

Defenders Metric against value

4

Transfer trends

Spending and activity by club and league

5

Future talent

Players aged 15–22 to plan ahead

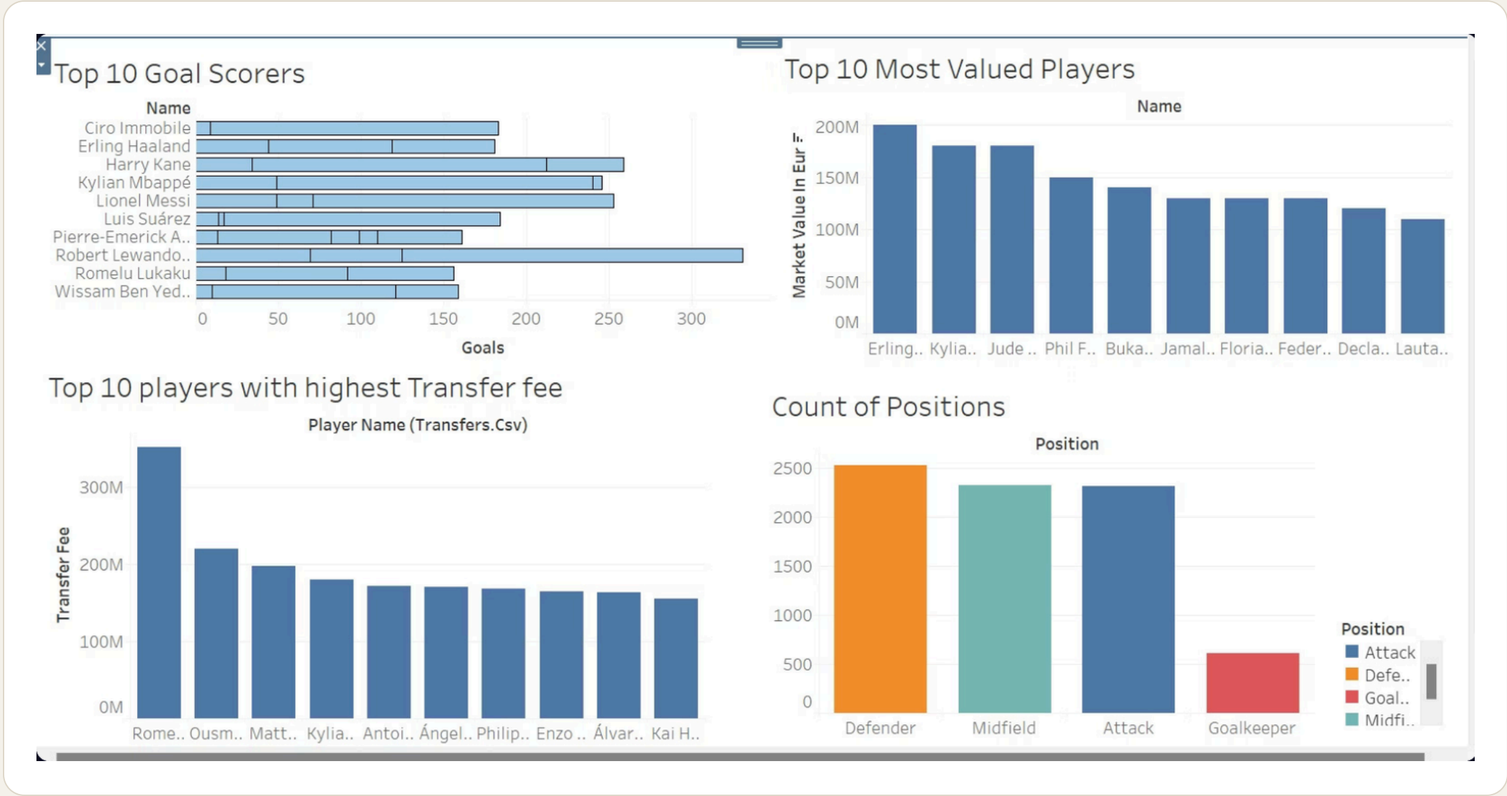

Every view filters by age group, position, matches played, market value, competition and season.

DASHBOARD 1

Market overview

The starting point: who scores most, who is valued highest, who cost the most, and how the player pool splits by position.

Takeaway: defenders are the largest position group, while goalkeepers are a small pool, so keeper options are scarcer.

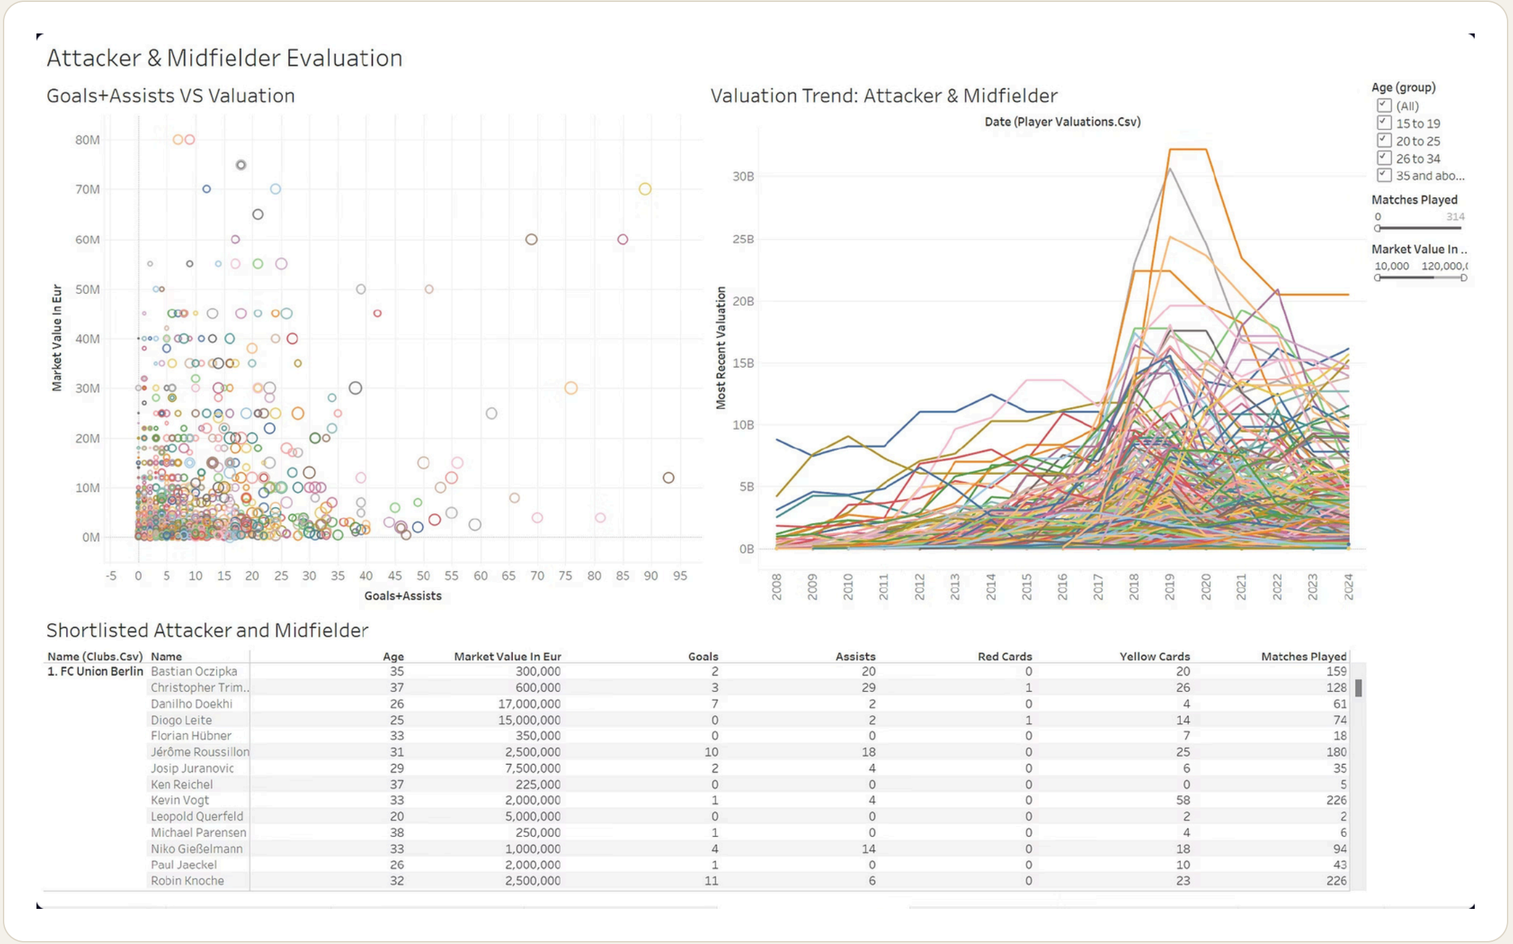

DASHBOARD 2

Attack and midfield

Goals + Assists plotted against market value, with each player's valuation trend and a shortlist table that updates with every filter.

Use it to spot players whose output is high for their price.

FINDING

€22M

buys 8 proven veterans, about a tenth of the budget

Filter: 250+ recorded matches and a market value of €5M or less.

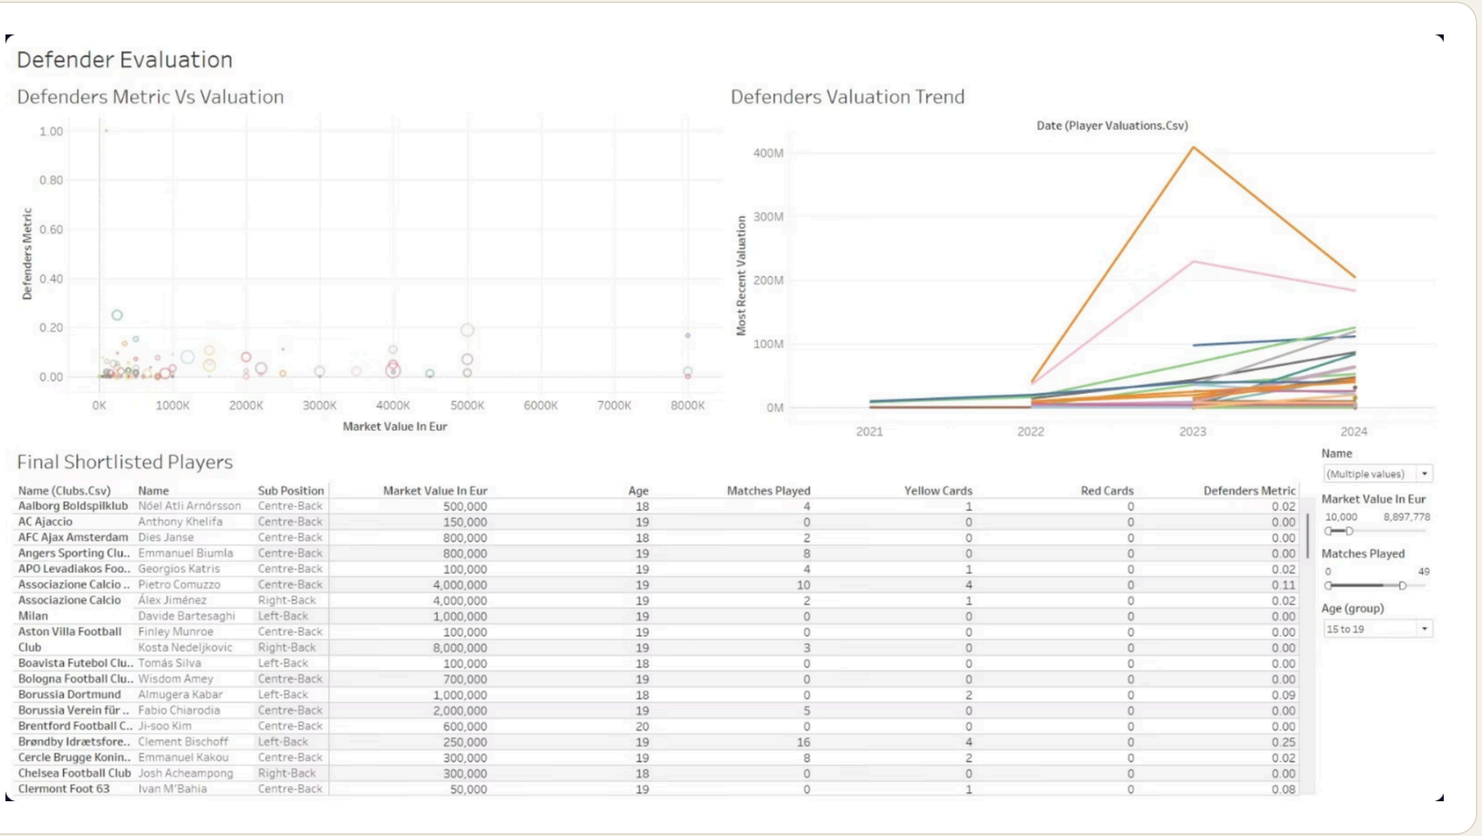

Player	Club	Age	Value	G	A
Cristiano Biraghi	Fiorentina	32	€3.5M	15	37
Mats Hummels	Roma	35	€5.0M	17	15
César Azpilicueta	Atlético	35	€2.0M	13	33
Leonardo Bonucci	Fenerbahçe	37	€1.0M	25	5
Francesco Acerbi	Inter	36	€3.5M	18	10
Germán Pezzella	Real Betis	33	€3.0M	13	6
Sergio Ramos	Sevilla	38	€2.5M	47	12
Raúl Albiol	Villarreal	39	€1.5M	6	5

DASHBOARD 3

Defenders

A custom Defenders Metric plotted against market value, with valuation trends and a table of shortlisted defenders.

Use it to narrow defenders by age, value and experience, for example low-cost prospects aged 15–19.

DASHBOARD 4

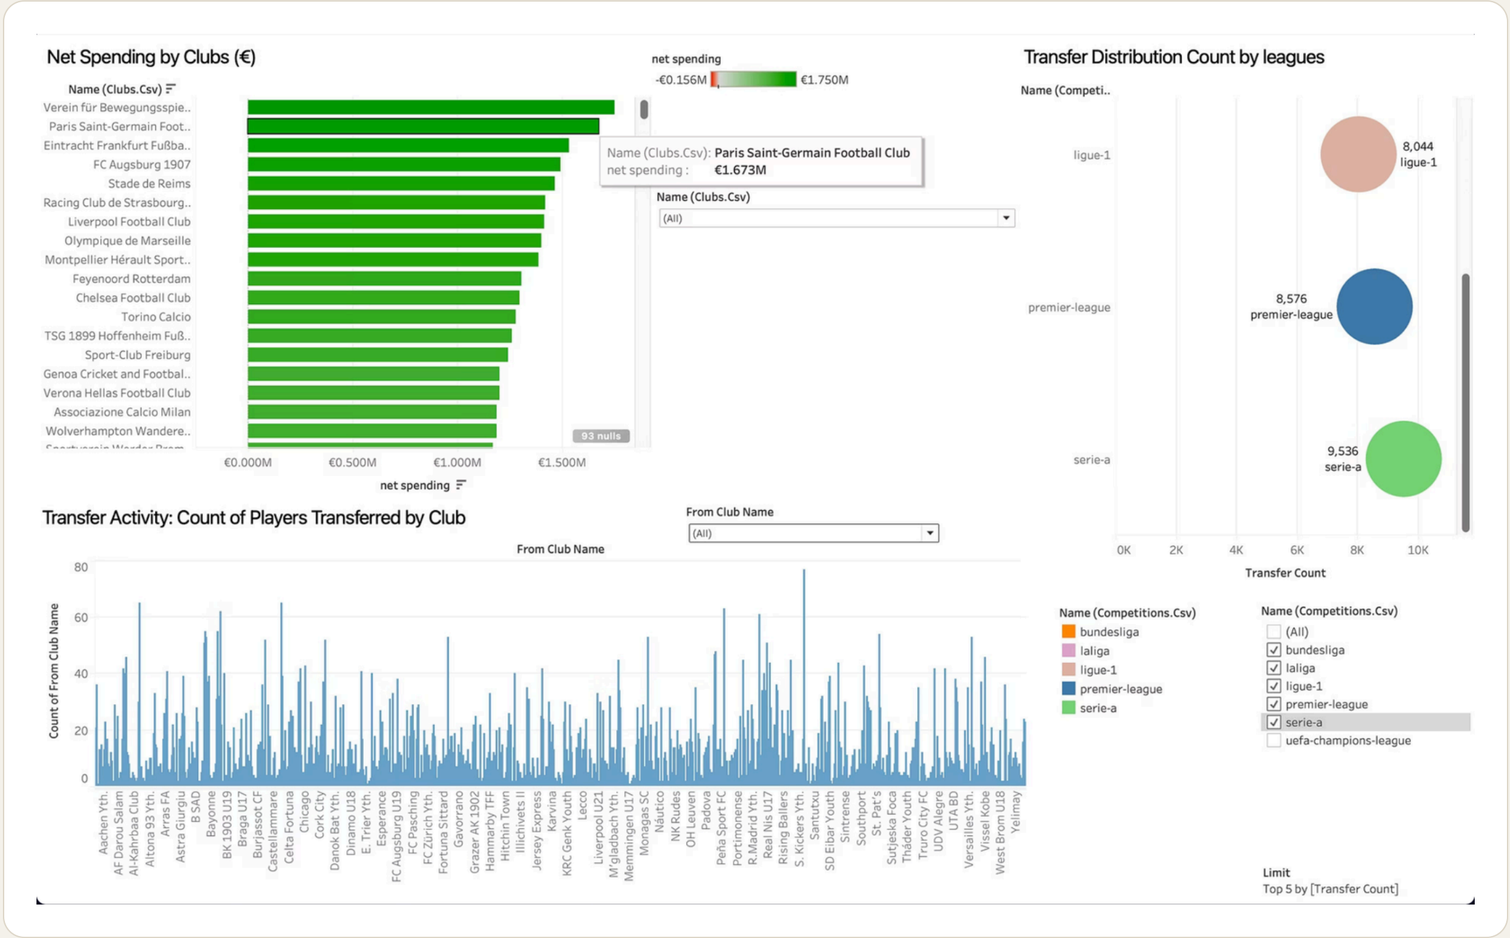

Transfer trends

9,536 Serie A transfers

8,576 Premier League

8,044 Ligue 1

Serie A and the Premier League are among the busiest leagues. Paris Saint-Germain ranks among the top net spenders.

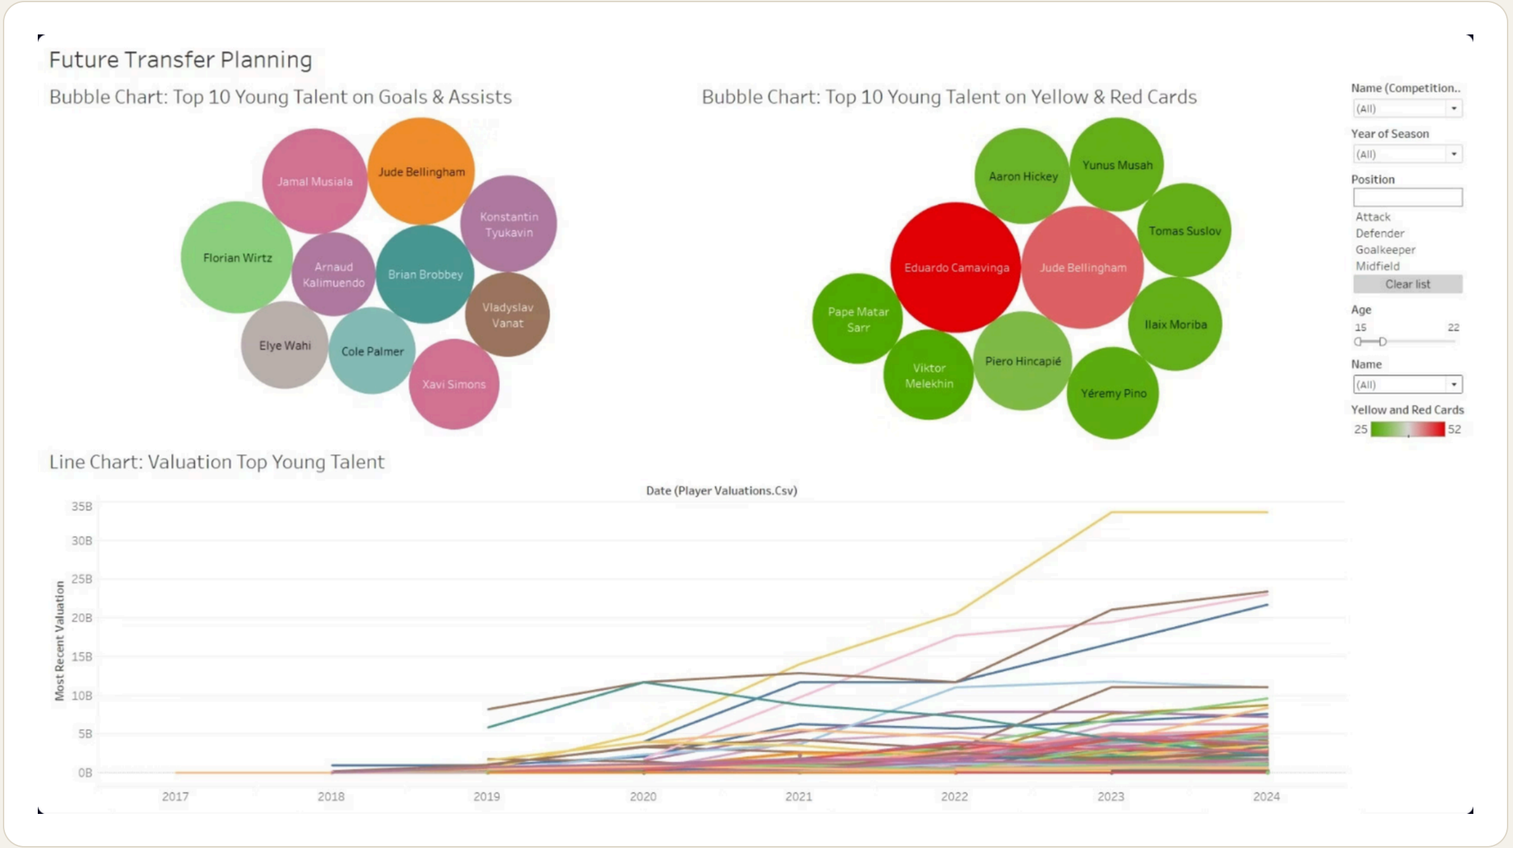

DASHBOARD 5

Future talent

The top 10 players aged 15–22 by goals and assists, the top 10 by cards, and how their values have moved.

Top talents include Bellingham, Musiala, Wirtz, Palmer and Simons. Camavinga and Bellingham are among the most carded, a discipline risk to weigh.

PUTTING IT TO USE

A recruitment plan in three moves

NOW

Sign proven, low-cost experience

Veterans like the €22M shortlist give an expansion side an experienced spine without straining the budget.

NEXT

Invest in young talent

Track young, low-cost prospects whose value can grow while they play.

ALWAYS

Scout where the market moves

Focus scouting on the busiest leagues and clubs, where players change hands most often.
